

Technical Bulletin

WashTechs 7420

DESCRIPTION

WashTechs 7420 is a formulated anti back-staining agent for application in the garment wet processing of denim. The product is based on polyester polymer chemistry. It contains surfactant additives, detergents, dispersants, and emulsifiers to enhance performance. It must be dispersed in water prior to use.

WashTechs 7420 is a liquid ready to use product. It is highly recommended for use as a high performance anti back staining agent on cotton and polyester fabric.

BENEFITS

WashTechs 7420 has the following beneficial characteristics.

- Economical Use
- Contains Performance Surfactants
- Excellent Dispersing Properties
- Prevents Indigo Dye Redeposition
- Compatible with Cellulase Enzymes

TYPICAL PROPERTIES

Color	Opaque Off-White
Texture	Liquid
Odor	Mild
Solids	About 21%

PREPARATION

WashTechs 7420 may be used as is. No pre dilution is required.

APPLICATION

The product may be used in the desize bath, abrasion bath and/or clean up bath. **WashTechs 7420** should be dosed as follows.

5.0 – 2.0% OWB

STORAGE

WashTechs 7420 should be stored in a cool, dry and well-ventilated area.

HANDLING

Follow good industrial hygiene when handling **WashTechs 7420**. Please refer to the Material Safety Data Sheet for details.

PACKAGING

WashTechs 7420 is available in 200-liter drums.
